PROFILE

.NETCoreWeb API Developer with Intership Experience in building and supporting RESTful APIs using ASP.NET Core and C#. Strong in backend troubleshooting, API integrations, performance optimization, and production support with ITIL-based processes. Experienced in debugging, troubleshooting, and resolving application issues, ensuring high availability and performance of backend services. Familiar with ITIL practices, incident management, and SLA-driven support in production environments.

Intership EXPERIENCE

Uniq Technologies — Software Developer Trainer Feb 2023 – Nov 2023

- Managed day-to-day development and training activities for .NET Full Stack projects.
- Delivered hands-on training in C#, ASP.NET, MVC, HTML5, CSS3, JavaScript, and SQL Server.
- Guided trainees through real-time application development, debugging, and best coding practices.
- Developed and maintained timelines for training modules, project milestones, and assessments.
- Delegated development tasks and assignments to trainees and monitored progress regularly.
- Motivated and mentored trainees to enhance problem-solving, coding standards, and technical confidence.

Proteam Software India Pvt Ltd—Software Engineer Trainee

July 2024 – Nov 2024

- Provided L1/L2 end-user and application support for web applications built using C#, ASP.NET, and .NET Core Web API.
- Assisted team members in troubleshooting application issues related to Dapper, Entity Framework, and PostgreSQL.
- Supported frontend issue resolution involving React.js and API integrations.
- Assisted in task delegation and timeline management for incoming support requests and defect fixes.
- Conducted user onboarding and training sessions to improve end-user adoption and application usability.
